JOURNAL OF SPACECRAFT AND ROCKETS
Volume 39, No. 6, November–December 2002

2002 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 936–940, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, page 941–942, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 943–947, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the ISBN number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2002, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

A02-124 Aerodynamics of Two Side-by-Side Plates in Hypersonic Rarefied-Gas Flows
A02-079 Applications of a Counterflow Drag Reduction Technique in High-Speed Systems
A02-034 Experimental and Numerical Investigation on Martian Atmosphere Entry
A02-033 Frequency Response of Pneumatic Tubing and Pressure Sensor Configurations in Slip-Flow Conditions
A02-049 Hypersonic Flow over a Blunt Body with Plasma Injection

Aeroelasticity and Aeroservoelasticity

A02-009 Flutter Analysis of a Wraparound Fin Projectile Considering Rolling Motion
A02-108 Supersonic/Hypersonic Flutter and Postflutter of Geometrically Imperfect Circular Cylindrical Panels

Aerospace Plane

A02-078 Drag Reduction on Blunt-Based Vehicles Using Forebody Surface Roughness

Cabin Environment, Crew Training, and Life Support

A02-029 Three-Dimensional Simulation: Microgravity Environments and Applications

Flight Mechanics

A02-005 To the Far Side of the Sun Using Venus Gravity Assist

Powerplant Integration

A02-017 Design of a Hybrid Chemical/Electric Propulsion Orbital Transfer Vehicle

Simulation

A02-080 Identification of Influential Uncertainties in Monte Carlo Analysis
A02-029 Three-Dimensional Simulation: Microgravity Environments and Applications

Structural Design (Including Loads)

A02-088 Design Study of a Square Solar Sail Architecture

Structural Materials

A02-115 Time-Dependent Response of Thin Film Piezoelectric Polymer Polyvinylidene Fluoride

Vibration

A02-031 Six-Axis Vibration Isolation System Using Soft Actuators and Multiple Sensors

Fluid Dynamics

Boundary-Layer Stability and Transition

A02-078 Drag Reduction on Blunt-Based Vehicles Using Forebody Surface Roughness
A02-025 Review and Synthesis of Roughness-Dominated Transition Correlations for Reentry Applications

Computational Fluid Dynamics

A02-048 Comprehensive Numerical Study of Jet-Flow Impingement over Flat Plates
A02-034 Experimental and Numerical Investigation on Martian Atmosphere Entry
A02-057 Numerical Analysis on Separation Dynamics of Strap-On Boosters in the Atmosphere
A02-050 Numerical Investigation of Supersonic Jet Interaction for Finned Bodies

Hypersonic Flow

A02-124 Aerodynamics of Two Side-by-Side Plates in Hypersonic Rarefied-Gas Flows
A02-079 Applications of a Counterflow Drag Reduction Technique in High-Speed Systems
A02-034 Experimental and Numerical Investigation on Martian Atmosphere Entry
A02-033 Frequency Response of Pneumatic Tubing and Pressure Sensor Configurations in Slip-Flow Conditions
A02-049 Hypersonic Flow over a Blunt Body with Plasma Injection
A02-125 Power-Law Shaped Leading Edges in Rarefied Hypersonic Flow
A02-108 Supersonic/Hypersonic Flutter and Postflutter of Geometrically Imperfect Circular Cylindrical Panels

Jets, Wakes, and Viscid-Inviscid Flow Interactions

A02-048 Comprehensive Numerical Study of Jet-Flow Impingement over Flat Plates
A02-026 Modeling of the Interaction of a Side Jet with a Rarefied Atmosphere
A02-050 Numerical Investigation of Supersonic Jet Interaction for Finned Bodies

Multiphase Flows

A02-040 Modeling of Chill Down in Cryogenic Transfer Lines

Plasmadynamics and MHD

A02-049 Hypersonic Flow over a Blunt Body with Plasma Injection
A02-054 Particle-in-Cell with Monte Carlo Simulation of SPT-100 Exhaust Plumes
A02-123 Plume Study of a 1.35-kW SPT-100 Using an ExB Probe

Rarefied Flows

A02-124 Aerodynamics of Two Side-by-Side Plates in Hypersonic Rarefied-Gas Flows
A02-033 Frequency Response of Pneumatic Tubing and Pressure Sensor Configurations in Slip-Flow Conditions
A02-026 Modeling of the Interaction of a Side Jet with a Rarefied Atmosphere
A02-125 Power-Law Shaped Leading Edges in Rarefied Hypersonic Flow

Separated Flows

A02-056 Mean and Fluctuating Pressure in Boat-Tail Separated Flows at Transonic Speeds

Supersonic Flow

A02-108 Supersonic/Hypersonic Flutter and Postflutter of Geometrically Imperfect Circular Cylindrical Panels

Transonic Flow

A02-056 Mean and Fluctuating Pressure in Boat-Tail Separated Flows at Transonic Speeds

Viscous Non-Boundary-Layer Flows

A02-078 Drag Reduction on Blunt-Based Vehicles Using Forebody Surface Roughness

Guidance, Control, and Dynamics Technology

Astrodynamics

A02-002 Automated Design of the Europa Orbiter Tour
A02-071 Collision Risk Posed to the Global Positioning System by Disposal Orbit Instability
A02-003 Design of Aerogravity-Assist Trajectories
A02-072 Energetic Cost and Viability of the Proposed Space Debris Mitigation Measures
A02-116 Estimation and Prediction of Orbital Debris Reentry Trajectories
A02-001 Graphical Method for Gravity-Assist Trajectory Design
A02-118 Optimal Spacecraft Rendezvous Using Genetic Algorithms
A02-117 Orbit Determination for the QuikSCAT Spacecraft
A02-107 Orbit Determination of Spacecraft Using Global Positioning System Single-Frequency Measurement
A02-012 Orbital Debris Environment Model in the Geosynchronous Region
A02-005 To the Far Side of the Sun Using Venus Gravity Assist

Computer Science

A02-065 Cellular Automata-Based Reconfigurable Systems as Transitional Approach to Gigascale Electronic Architectures
A02-080 Identification of Influential Uncertainties in Monte Carlo Analysis

Control System Design

A02-070 Evolved Seasparrow Missile Jet Vane Control System Prototype Hardware Development
A02-038 Hardware Experiments of a Truss Assembly by an Autonomous Space Learning Robot

Control System Sensors

A02-010 Determining Angular Velocity and Angular Acceleration of Projectiles Using Triaxial Acceleration Measurements

Dynamics

A02-083 Atmospheric Reentry Modeling and Simulation
A02-096 Resistive Deployment of Inflatable Structures Using Velcro

Fiber Optics

A02-024 Fiber-Optic Sensors for the Study of Spacecraft-Thruster Interactions: Ion Sputtering

Flight Mechanics

A02-083 Atmospheric Reentry Modeling and Simulation
A02-007 Dynamic Stability of Blunt Atmospheric Entry Configurations
A02-051 Linearized Motion of a Fin-Stabilized Projectile Subjected to a Lateral Impulse

Launch Vehicle Guidance and Control

A02-069 Initial Guess Generation for Rocket Ascent Trajectory Optimization Using Indirect Methods

Missile Dynamics

A02-010 Determining Angular Velocity and Angular Acceleration of Projectiles Using Triaxial Acceleration Measurements
A02-051 Linearized Motion of a Fin-Stabilized Projectile Subjected to a Lateral Impulse

Missile Guidance and Control

A02-010 Determining Angular Velocity and Angular Acceleration of Projectiles Using Triaxial Acceleration Measurements

Optimization Techniques

A02-118 Optimal Spacecraft Rendezvous Using Genetic Algorithms

Pointing Systems

A02-043 Condition Monitoring of Filament-Wound Composite Flywheels Having Circumferential Cracks

Signal Processing

A02-065 Cellular Automata-Based Reconfigurable Systems as Transitional Approach to Gigascale Electronic Architectures

Software Technology

A02-064 Advances in Data Handling Systems for Space Experiment Control

Spacecraft Dynamics

A02-047 Plasma Propulsion Options for Multiple Terrestrial Planet Finder Architectures
A02-102 Satellite Attitude Stabilization Through Kite-Like Tether Configuration
A02-045 Thermally-Induced Attitude Disturbance Control for a Spacecraft with a Flexible Boom

Spacecraft Guidance and Control

A02-032 Dynamic Model and Control of Mass-Distributed Tether Satellite System
A02-038 Hardware Experiments of a Truss Assembly by an Autonomous Space Learning Robot
A02-117 Orbit Determination for the QuikSCAT Spacecraft

State Estimation

A02-116 Estimation and Prediction of Orbital Debris Reentry Trajectories
A02-107 Orbit Determination of Spacecraft Using Global Positioning System Single-Frequency Measurement

Structural Control

A02-045 Thermally-Induced Attitude Disturbance Control for a Spacecraft with a Flexible Boom

Trajectory Optimization

A02-079 Applications of a Counterflow Drag Reduction Technique in High-Speed Systems
A02-083 Atmospheric Reentry Modeling and Simulation
A02-069 Initial Guess Generation for Rocket Ascent Trajectory Optimization Using Indirect Methods
A02-118 Optimal Spacecraft Rendezvous Using Genetic Algorithms
A02-005 To the Far Side of the Sun Using Venus Gravity Assist

Interdisciplinary Topics

Aerospace Management

A02-036 Spacecraft Design Lifetime

Aerospace Technology Utilization

A02-065 Cellular Automata-Based Reconfigurable Systems as Transitional Approach to Gigascale Electronic Architectures

Analytical and Numerical Methods

A02-053 Plasma Response to Jump of Insulator Surface Potential in Ionospheric Plasma Environment
A02-110 Simplified Algorithm for Short Target-Approach Paths in Orbit

Atmospheric and Space Sciences

A02-044 Ionospheric Specification and Forecast Modeling
A02-093 Multilayered Polymer Mirror Experiment

Environmental Effects

A02-072 Energetic Cost and Viability of the Proposed Space Debris Mitigation Measures
A02-014 Hazards of Hypervelocity Impacts on Spacecraft
A02-053 Plasma Response to Jump of Insulator Surface Potential in Ionospheric Plasma Environment

Lasers and Laser Applications

A02-037 Laser Elevator: Momentum Transfer Using an Optical Resonator
A02-011 Laser Radiation for Cleaning Lower Earth Orbits
A02-055 Optimized Solutions for Kistler K-1 Branching Trajectories Using Multidisciplinary Design OptimizationTechniques

Multidisciplinary Design Optimization

A02-019 Cost-Optimum Electric Propulsion for Constellations
A02-103 Optimization of Double Link Transmission in Case in Hybrid Orbit Satellite Constellations

Safety

A02-011 Laser Radiation for Cleaning Lower Earth Orbits
A02-012 Orbital Debris Environment Model in the Geosynchronous Region

Sensor Systems

A02-093 Multilayered Polymer Mirror Experiment

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

A02-008 Improved Semi-Empirical Method for Power-On Base-Drag Prediction
A02-050 Numerical Investigation of Supersonic Jet Interaction for Finned Bodies
A02-082 Sabot Opening Lift Force: Analysis, Computation, and Test

Configuration Design

A02-075 First Stage Design Variations of Partially Reusable Launch Vehicles
A02-008 Improved Semi-Empirical Method for Power-On Base-Drag Prediction
A02-111 Low-Cost Small-Satellite Delivery System
A02-057 Numerical Analysis on Separation Dynamics of Strap-On Boosters in the Atmosphere
A02-016 Two-Stage Launch Vehicles for Heavy Payloads

Launch Vehicle and Sounding Rocket Systems

A02-075 First Stage Design Variations of Partially Reusable Launch Vehicles
A02-111 Low-Cost Small-Satellite Delivery System
A02-055 Optimized Solutions for Kistler K-1 Branching Trajectories Using Multidisciplinary Design OptimizationTechniques
A02-016 Two-Stage Launch Vehicles for Heavy Payloads

Missile Systems

A02-008 Improved Semi-Empirical Method for Power-On Base-Drag Prediction

Mission Studies and Economics

A02-047 Plasma Propulsion Options for Multiple Terrestrial Planet Finder Architectures

Propulsion and Propellant Systems

A02-088 Design Study of a Square Solar Sail Architecture
A02-037 Laser Elevator: Momentum Transfer Using an Optical Resonator

Trajectories and Tracking Systems

A02-069 Initial Guess Generation for Rocket Ascent Trajectory Optimization Using Indirect Methods
A02-055 Optimized Solutions for Kistler K-1 Branching Trajectories Using Multidisciplinary Design OptimizationTechniques

Vibration

A02-009 Flutter Analysis of a Wraparound Fin Projectile Considering Rolling Motion

Propulsion

Advanced Space Propulsion

A02-030 Analysis of Bare-Tether Systems for Deorbiting Low-Earth-Orbit Satellites
A02-017 Design of a Hybrid Chemical/Electric Propulsion Orbital Transfer Vehicle
A02-037 Laser Elevator: Momentum Transfer Using an Optical Resonator
A02-128 Payload Mass Fraction Optimization for Solar Sail Cargo Missions
A02-120 Realizing "2001: A Space Odyssey": Piloted Spherical Torus Nuclear Fusion Propulsion

Electric Propulsion

A02-030 Analysis of Bare-Tether Systems for Deorbiting Low-Earth-Orbit Satellites
A02-019 Cost-Optimum Electric Propulsion for Constellations
A02-017 Design of a Hybrid Chemical/Electric Propulsion Orbital Transfer Vehicle
A02-077 Design of the First InterplanetarySolar Electric Propulsion Mission
A02-121 Electric Propulsion Plasma Simulations and Influence on Spacecraft Charging
A02-027 Electric Propulsion Space Experiment (ESEX) On-Orbit Results
A02-024 Fiber-Optic Sensors for the Study of Spacecraft-Thruster Interactions: Ion Sputtering
A02-015 Impact Analysis of Hall Thrusters on Satellite Antenna Performance
A02-047 Plasma Propulsion Options for Multiple Terrestrial Planet Finder Architectures
A02-123 Plume Study of a 1.35-kW SPT-100 Using an ExB Probe

Engine Materials

A02-018 New Failure Criterion for Space Shuttle Main Engine Turbine Blades

Liquid Rocket Engines

A02-018 New Failure Criterion for Space Shuttle Main Engine Turbine Blades

Solid Rocket Motors

A02-070 Evolved Seasparrow Missile Jet Vane Control System Prototype Hardware Development

Space Technology

Aerobraking Flight Mechanics

A02-007 Dynamic Stability of Blunt Atmospheric Entry Configurations

Global Positioning System

A02-071 Collision Risk Posed to the Global Positioning System by Disposal Orbit Instability
A02-107 Orbit Determination of Spacecraft Using Global Positioning System Single-Frequency Measurement

Humans in Space/Life Support Systems, EVA

A02-029 Three-Dimensional Simulation: Microgravity Environments and Applications

Mission Design and Analysis

A02-100 Arizona State University Satellite (ASUSat1): Low-Cost, Student-Designed Nanosatellite
A02-002 Automated Design of the Europa Orbiter Tour
A02-019 Cost-Optimum Electric Propulsion for Constellations
A02-003 Design of Aerogravity-Assist Trajectories
A02-077 Design of the First InterplanetarySolar Electric Propulsion Mission
A02-072 Energetic Cost and Viability of the Proposed Space Debris Mitigation Measures
A02-001 Graphical Method for Gravity-Assist Trajectory Design
A02-103 Optimization of Double Link Transmission in Case in Hybrid Orbit Satellite Constellations
A02-128 Payload Mass Fraction Optimization for Solar Sail Cargo Missions
A02-036 Spacecraft Design Lifetime
A02-016 Two-Stage Launch Vehicles For Heavy Payloads

Mission Trajectories (Earth and Interplanetary)

A02-002 Automated Design of the Europa Orbiter Tour
A02-003 Design of Aerogravity-Assist Trajectories
A02-077 Design of the First InterplanetarySolar Electric Propulsion Mission
A02-001 Graphical Method for Gravity-Assist Trajectory Design
A02-128 Payload Mass Fraction Optimization for Solar Sail Cargo Missions
A02-110 Simplified Algorithm for Short Target-Approach Paths in Orbit

Space Experiments

A02-064 Advances in Data Handling Systems for Space Experiment Control
A02-058 Effects of Ambient Air Exposure on Atomic Oxygen-Exposed Kapton-H Films
A02-027 Electric Propulsion Space Experiment (ESEX) On-Orbit Results

Space Processing

A02-064 Advances in Data Handling Systems for Space Experiment Control

Space Systems

A02-030 Analysis of Bare-Tether Systems for Deorbiting Low-Earth-Orbit Satellites
A02-100 Arizona State University Satellite (ASUSat1): Low-Cost, Student-Designed Nanosatellite
A02-071 Collision Risk Posed to the Global Positioning System by Disposal Orbit Instability
A02-032 Dynamic Model and Control of Mass-Distributed Tether Satellite System
A02-038 Hardware Experiments of a Truss Assembly by an Autonomous Space Learning Robot
A02-014 Hazards of Hypervelocity Impacts on Spacecraft

A02-021 In-Flight Estimation of the Cassini Spacecraft's Inertia Tensor
A02-011 Laser Radiation for Cleaning Lower Earth Orbits
A02-028 Mir Solar-Array Return Experiment: Power Performance Measurements and Molecular Contamination Analysis Results
A02-076 Parametric Analysis of Fiber-Reinforced Laminated Momentum Wheel Rotors
A02-102 Satellite Attitude Stabilization Through Kite-Like Tether Configuration
A02-073 Space Systems Flexibility Provided by On-Orbit Servicing: Part 1
A02-074 Space Systems Flexibility Provided by On-Orbit Servicing: Part 2
A02-036 Spacecraft Design Lifetime

Spacecraft Attitude Determination

A02-060 Everything Is Relative in Spacecraft System Alignment Calibration

Spacecraft Communication

A02-015 Impact Analysis of Hall Thrusters on Satellite Antenna Performance
A02-103 Optimization of Double Link Transmission in Case in Hybrid Orbit Satellite Constellations

Spacecraft Contamination/Sterilization

A02-026 Modeling of the Interaction of a Side Jet with a Rarefied Atmosphere

Spacecraft Power

A02-043 Condition Monitoring of Filament-Wound Composite Flywheels Having Circumferential Cracks
A02-006 Design Considerations When Using Edge-Mounted Heat Pipes in Space Radiators
A02-028 Mir Solar-Array Return Experiment: Power Performance Measurements and Molecular Contamination Analysis Results
A02-053 Plasma Response to Jump of Insulator Surface Potential in Ionospheric Plasma Environment
A02-120 Realizing "2001: A Space Odyssey": Piloted Spherical Torus Nuclear Fusion Propulsion

Spacecraft Propulsion System Integration

A02-121 Electric Propulsion Plasma Simulations and Influence on Spacecraft Charging
A02-027 Electric Propulsion Space Experiment (ESEX) On-Orbit Results
A02-015 Impact Analysis of Hall Thrusters on Satellite Antenna Performance
A02-120 Realizing "2001: A Space Odyssey": Piloted Spherical Torus Nuclear Fusion Propulsion

Spacecraft Radiation Protection

A02-014 Hazards of Hypervelocity Impacts on Spacecraft

Spacecraft Sensor Systems

A02-024 Fiber-Optic Sensors for the Study of Spacecraft-Thruster Interactions: Ion Sputtering
A02-093 Multilayered Polymer Mirror Experiment

Spacecraft Structural Configuration, Design, and Analysis

A02-100 Arizona State University Satellite (ASUSat1): Low-Cost, Student-Designed Nanosatellite
A02-087 Dimensional Repeatability of an Elastically Folded Composite Hinge for Deployed Spacecraft Optics
A02-089 Geometric Imperfection Effects in an Elastically Deployable Isogrid Column
A02-042 Local Effects of Piezopolymer Patches on Inflatable Space-Based Structures
A02-091 Rational for Defining Structural Requirements for Large Space Telescopes

Spacecraft Test and Evaluation

A02-059 Detection of Hydrogen Leakage in a Composite Sandwich Structure at Cryogenic Temperature
A02-007 Dynamic Stability of Blunt Atmospheric Entry Configurations

Spacecraft Thermal Management

A02-006 Design Considerations When Using Edge-Mounted Heat Pipes in Space Radiators
A02-058 Effects of Ambient Air Exposure on Atomic Oxygen-Exposed Kapton-H Films
A02-114 Electron, Proton, and Ultraviolet Radiation Effects on Thermophysical Properties of Polymeric Films
A02-046 Review of Spacecraft Cryogenic Coolers
A02-020 Spacecraft Thermal Analysis and Control by Thermal Energy Optimum Distribution

Structural Mechanics and Materials

Dynamic Model Analysis

A02-032 Dynamic Model and Control of Mass-Distributed Tether Satellite System
A02-098 Modeling a Piezothermoelastic Beam-String

Flexible and Active Structures

A02-095 Deployable Tensegrity Reflectors for Small Satellites
A02-042 Local Effects of Piezopolymer Patches on Inflatable Space-Based Structures
A02-098 Modeling a Piezothermoelastic Beam-String
A02-096 Resistive Deployment of Inflatable Structures Using Velcro
A02-031 Six-Axis Vibration Isolation System Using Soft Actuators and Multiple Sensors
A02-045 Thermally Induced Attitude Disturbance Control for a Spacecraft with a Flexible Boom

Materials Structural Properties

A02-114 Electron, Proton, and Ultraviolet Radiation Effects on Thermophysical Properties of Polymeric Films
A02-113 Finite Element Modeling of the Axial Collapse of Foam-Filled Structures
A02-018 New Failure Criterion for Space Shuttle Main Engine Turbine Blades
A02-092 Self-Rigidizable Space Inflatable Boom
A02-115 Time-Dependent Response of Thin Film Piezoelectric Polymer Polyvinylidene Fluoride

Structural Composite Materials

A02-059 Detection of Hydrogen Leakage in a Composite Sandwich Structure at Cryogenic Temperature
A02-087 Dimensional Repeatability of an Elastically Folded Composite Hinge for Deployed Spacecraft Optics
A02-076 Parametric Analysis of Fiber-Reinforced Laminated Momentum Wheel Rotors
A02-091 Rational for Defining Structural Requirements for Large Space Telescopes

Structural Design

A02-095 Deployable Tensegrity Reflectors for Small Satellites
A02-023 Fundamental Frequency of Rocket and Missile Upper Stages: Quick Preliminary Design Solution
A02-076 Parametric Analysis of Fiber-Reinforced Laminated Momentum Wheel Rotors
A02-091 Rational for Defining Structural Requirements for Large Space Telescopes
A02-092 Self-Rigidizable Space Inflatable Boom

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

A02-043 Condition Monitoring of Filament-Wound Composite Flywheels Having Circumferential Cracks
A02-059 Detection of Hydrogen Leakage in a Composite Sandwich Structure at Cryogenic Temperature
A02-022 Impingement Angle Dependence of Erosion Rate of Polyimide in Atomic Oxygen Exposures
A02-115 Time-Dependent Response of Thin Film Piezoelectric Polymer Polyvinylidene Fluoride

Structural Dynamics and Characterization

A02-009 Flutter Analysis of a Wraparound Fin Projectile Considering Rolling Motion
A02-023 Fundamental Frequency of Rocket and Missile Upper Stages: Quick Preliminary Design Solution
A02-042 Local Effects of Piezopolymer Patches on Inflatable Space-Based Structures
A02-099 Nonlinear Pressurization and Modal Analysis Procedure for Dynamic Modeling of Inflatable Structures
A02-096 Resistive Deployment of Inflatable Structures Using Velcro
A02-092 Self-Rigidizable Space Inflatable Boom

Structural Finite Elements

A02-113 Finite Element Modeling of the Axial Collapse of Foam-Filled Structures

Structural Modeling

A02-023 Fundamental Frequency of Rocket and Missile Upper Stages: Quick Preliminary Design Solution
A02-089 Geometric Imperfection Effects in an Elastically Deployable Isogrid Column
A02-098 Modeling a Piezothermoelastic Beam-String

Structural Stability

A02-088 Design Study of a Square Solar Sail Architecture

A02-087 Dimensional Repeatability of an Elastically Folded Composite Hinge for Deployed Spacecraft Optics

A02-089 Geometric Imperfection Effects in an Elastically Deployable Isogrid Column

Thermophysics and Heat Transfer

Aerothermodynamics/Thermal Protection

A02-067 Coupled Aeroheating/Ablation Analysis for Missile Configurations

A02-025 Review and Synthesis of Roughness-Dominated Transition Correlations for Reentry Applications

A02-068 Thermal Analysis and Design Optimization of Multilayer Insulation for Reentry Aerodynamic Heating

Computational Heat Transfer

A02-040 Modeling of Chill Down in Cryogenic Transfer Lines

Cryogenics

A02-046 Review of Spacecraft Cryogenic Coolers

Heat Conduction

A02-068 Thermal Analysis and Design Optimization of Multilayer Insulation for Reentry Aerodynamic Heating

Heat Pipes

A02-006 Design Considerations When Using Edge-Mounted Heat Pipes in Space Radiators

Radiation in Participating Media

A02-068 Thermal Analysis and Design Optimization of Multilayer Insulation for Reentry Aerodynamic Heating

Thermal Control

A02-046 Review of Spacecraft Cryogenic Coolers

Thermal Modeling and Analysis

A02-067 Coupled Aeroheating/Ablation Analysis for Missile Configurations

A02-040 Modeling of Chill Down in Cryogenic Transfer Lines

Thermochemistry and Chemical Kinetics

A02-028 Mir Solar-Array Return Experiment: Power Performance Measurements and Molecular Contamination Analysis Results

Thermophysical Properties

A02-114 Electron, Proton, and Ultraviolet Radiation Effects on Thermophysical Properties of Polymeric Films

Chronological Index

A02-001 Graphical Method for Gravity-Assist Trajectory Design. Nathan J. Strange and James M. Longuski, *Purdue University* (**39**, 1, p. 9) Article

A02-002 Automated Design of the Europa Orbiter Tour. Andrew F. Heaton, Nathan J. Strange, and James M. Longuski, *Purdue University*; and Eugene P. Bonfiglio, *Jet Propulsion Laboratory* (**39**, 1, p. 17) Article

A02-003 Design of Aerogravity-Assist Trajectories. W. R. Johnson and James M. Longuski, *Purdue University* (**39**, 1, p. 23) Article

A02-004 Mars Free Returns via Gravity Assist From Venus. Masataka Okutsu and James M. Longuski, *Purdue University* (**39**, 1, p. 31) Article

A02-005 To the Far Side of the Sun Using Venus Gravity Assist. Paul A. Penzo, *Jet Propulsion Laboratory* (**39**, 1, p. 37) Article based on AIAA Paper AIAA-2000-4140

A02-006 Design Considerations When Using Edge-Mounted Heat Pipes in Space Radiators. Todd William Moss and W. Jerry Bowman, *Brigham Young University* (**39**, 1, p. 41) Article

A02-007 Dynamic Stability of Blunt Atmospheric Entry Configurations. Gerald L. Winchenbach and Gary T. Chapman, *University of Florida*; Wayne H. Hathaway, *Arrow Tech Associates*; Alvin Ramsey, *University of California at Berkeley*; and Claude Berner, *French German Research Institute, France* (**39**, 1, p. 49) Article

A02-008 Improved Semi-Empirical Method for Power-On Base-Drag Prediction. F. G. Moore, *Aeroprediction Inc.*; and T. C. Hyner, *U. S. Naval Surface Warfare Center* (**39**, 1, p. 56) Article based on AIAA Paper 2001-4328

A02-009 Flutter Analysis of a Wraparound Fin Projectile Considering Rolling Motion. Seung-Kil Paek, Jae-Sung Bae, and In Lee, *Korea Advanced Institute of Science and Technology, Republic of Korea* (**39**, 1, p. 66) Article

A02-010 Determining Angular Velocity and Angular Acceleration of Projectiles Using Triaxial Acceleration Measurements. Mark Costello and Thanat Jitpraphai, *Oregon State University* (**39**, 1, p. 73) Article

A02-011 Laser Radiation for Cleaning Lower Earth Orbits. Wolfgang O. Schall, *DLR, German Aerospace Center, Germany* (**39**, 1, p. 81) Article

A02-012 Orbital Debris Environment Model in the Geosynchronous Region. Toshiya Hanada and Tetsuo Yasaka, *Kyushu University, Japan* (**39**, 1, p. 92) Article

A02-013 Exposure of Polycyanurate and Epoxy Matrix Composites to Hypergolic Rocket Fuel Components. R. J. Zaldivar, *The Aerospace Corporation*; R. W. Kobayashi, *The Areospace Corporation*; and T. J. Dickinson, *U.S. Air Force Space and Missiles Command* (**39**, 1, p. 99) Article

A02-014 Hazards of Hypervelocity Impacts on Spacecraft. Shu T. Lai and Edmond Murad, *U.S. Air Force Research Laboratory*; and William J. McNeil, *Radex, Inc.*, (**39**, 1, p. 106) Article

A02-015 Impact Analysis of Hall Thrusters on Satellite Antenna Performance. Gary A. Hallock, James C. Wiley, Ashish Khanna, and Edmund A. Spencer, *The University of Texas at Austin*; and J. William Meyer and Joseph T. Loane, *Lockheed Martin Space Systems Company* (**39**, 1, p. 115) Article based on AIAA Paper 2000-3519

A02-016 Two-Stage Launch Vehicles for Heavy Payloads. B. B. Donahue, *The Boeing Company* (**39**, 1, p. 125) Article

A02-017 Design of a Hybrid Chemical/Electric Propulsion Orbital Transfer Vehicle. Laurie M. Mailhe and Stephen D. Heister, *Purdue University* (**39**, 1, p. 131) Article

A02-018 New Failure Criterion for Space Shuttle Main Engine Turbine Blades. M. Tarek Sayyah, *Sverdrup Technology, Inc.*; and W. P. Schonberg, *University of Missouri–Rolla* (**39**, 1, p. 140) Article

A02-019 Cost-Optimum Electric Propulsion for Constellations. Vladimir N. Vinogradov and Vyacheslav M. Murashko, *Experimental Design Bureau "Fakel", Russia*; and Fabrizio Scortecci, *Aerospazio Tecnologie s.r.l., Italy* (**39**, 1, p. 146) Engineering Note

A02-020 Spacecraft Thermal Analysis and Control by Thermal Energy Optimum Distribution. Marino Fragnito, *Goupe d'Etudes et de Conseils en Ingenierie, France*; and Massimiliano Pastena and Marco D'Errico, *Second University of Naples, Italy* (**39**, 1, p. 149) Engineering Note

A02-021 In-Flight Estimation of the Cassini Spacecraft's Inertia Tensor. Allan Y. Lee, *Jet Propulsion Laboratory, California Institute of Technology*; and Julie A. Wertz, *Massachusetts Institute of Technology* (**39**, 1, p. 153) Engineering Note

A02-022 Impingement Angle Dependence of Erosion Rate of Polyimide in Atomic Oxygen Exposures. Kumiko Yokota, Masahito Tagawa, and Nobuo Ohmae, *Kobe University, Japan* (**39**, 1, p. 155) Engineering Note

A02-023 Fundamental Frequency of Rocket and Missile Upper Stages: Quick Preliminary Design Solution. G. Venkateswara Rao and K. Kanaka Raju, *Vikram Sarabhai Space Centre, India* (**39**, 1, p. 157) Engineering Note

A02-024 Fiber-Optic Sensors for the Study of Spacecraft-Thruster Interactions: Ion Sputtering. Andrew D. Ketsdever, *U.S. Air Force Research Laboratory*; and Brian M. Eccles, *University of Southern California* (**39**, 1, p. 158) Engineering Note based on AIAA Paper 2001-2958

A02-025 Review and Synthesis of Roughness-Dominated Transition Correlations for Reentry Applications. Daniel C. Reda, *NASA Ames Research Center* (**39**, 2, p. 161) Survey

A02-026 Modeling of the Interaction of a Side Jet with a Rarefied Atmosphere. S. F. Gimelshein, *George Washington University*; A. A. Alexeenko, *Pennsylvania State University*; and D. A. Levin, *Pennsylvania State University* (**39**, 2, p. 168) Article

A02-027 Electric Propulsion Space Experiment (ESEX) On-Orbit Results. D.R. Bromaghim, J.R. LeDuc, R. M. Salasovich, G. G. Spanjers, J. M. Fife, and M. J. Dulligan, J. H. Schilling, and D. C. White, *U.S. Air Force Research Laboratory; and* L. K. Johnson, *The Aerospace Corporation* (**39**, 2, p. 177) Article

A02-028 Mir Solar-Array Return Experiment: Power Performance Measurements and Molecular Contamination Analysis Results. James Visentine, *Boeing Space Station Program Office*; William Kinard, *NASA Langley Research Center*; David Brinker and Bruce Banks, *NASA John H. Glenn Research Center at Lewis Field*; and Keith Albyn, *NASA Marshall Space Flight Center* (**39**, 2, p. 187) Article based on AIAA Paper 2001-0684

A02-029 Three-Dimensional Simulation: Microgravity Environments and Applications. S. L. Hunter, C. Dischinger, and S. Estes, *NASA Marshall Space Flight Center* (**39**, 2, p. 194) Article

A02-030 Analysis of Bare-Tether Systems for Deorbiting Low-Earth-Orbit Satellites. E. Ahedo and J. R. Sanmartín, *Universidad Politécnica De Madrid, Spain* (**39**, 2, p. 198) Article

A02-031 Six-Axis Vibration Isolation System Using Soft Actuators and Multiple Sensors. Doug Thayer, Mark Campbell, and Juris Vagners, *University of Washington*; Andrew von Flotow, *Hood Technology Corporation* (**39**, 2, p. 206) Article

A02-032 Dynamic Model and Control of Mass-Distributed Tether Satellite System. Shaohua Yu, *Academia Sinica, People's Republic of China* (**39**, 2, p. 213) Article

A02-033 Frequency Response of Pneumatic Tubing and Pressure Sensor Configurations in Slip-Flow Conditions. Stephen A. Whitmore, *Naval Postgraduate School* (**39**, 2, p. 219) Article

A02-034 Experimental and Numerical Investigation on Martian Atmosphere Entry. Diego Paterna, Rodolfo Monti, Raffaele Savino, and Antonio Esposito, *Universita di Napoles "Federico II", Italy* (**39**, 2, p. 227) Article based on AIAA Paper 2001-0751

A02-035 Earth Impact Studies for Mars Sample Return. Edwin L. Fasanella and Yvonne Jones, *NASA Langley Research Center*; Norman F. Knight and Sotiris Kellas, *Veridian Systems* (**39**, 2, p. 237) Article

A02-036 Spacecraft Design Lifetime. Joseph H. Saleh, Daniel E. Hastings, and Dava J. Newman, *Massachusetts Institute of Technology* (**39**, 2, p. 244) Article

A02-037 Laser Elevator: Momentum Transfer Using an Optical Resonator. Thomas R. Meyer, *Boulder Center for Science and Policy*; Wayne R. Pryor, *University of Colorado*; Christopher P. McKay, *NASA Ames Research Center*; and Paul M. McKenna, *National Telecommunications and Information Administration* (**39**, 2, p. 258) Article

A02-038 Hardware Experiments of a Truss Assembly by an Autonomous Space Learning Robot. Kei Senda, Yoshisada Murotsu, Akira Misuya, Hirokazu Adachi, Shin'ichi Ito, Junya Shitakubo, and Tsutomu Matsumoto, *Osaka Prefecture University, Japan* (**39**, 2, p. 267) Article based on AIAA Paper 2000-4377

A02-039 Comparison of Multiple Agent-Based Organizations for Satellite Constellations. Mark Campbell and Thomas Schetter, *University of Washington* (**39**, 2, p. 274) Article

A02-040 Modeling of Chill Down in Cryogenic Transfer Lines. Matthew F. Cross, *University of Connecticut*; Alok K. Majumdar, *Marshall Space Flight Center*; and John C. Bennett, Jr., and Ramesh B. Malla, *University of Connecticut* (**39**, 2, p. 284) Article

A02-041 Compressive Response of Lightweight Ceramic Ablators: Silicone Impregnated Reusable Ceramic Ablator. Kelly E. Parmenter, Karl Shuman, and Frederick Milstein, *University of California, Santa Barbara*; and Christine E. Szalai, Huy K. Tran, and Daniel J. Rasky, *NASA Ames Research Center* (**39**, 2, p. 290) Article

A02-042 Local Effects of Piezopolymer Patches on Inflatable Space-Based Structures. R. Brett Williams, *Virginia Polytechnic Institute and State University*; Eric M. Austin, *Clemson University*; and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**39**, 2, p. 299) Article

A02-043 Condition Monitoring of Filament-Wound Composite Flywheels Having Circumferential Cracks. Fuh-Wen Shiue, George A. Lesieutre, and Charles E. Bakis, *Pennsylvania State University* (**39**, 2, p. 306) Article based on AIAA Paper 2001-1441

A02-044 Ionospheric Specification and Forecast Modeling. Robert W. Schunk, Ludger Scherliess, and Jan J. Sojka, *Utah State University* (**39**, 2, p. 314) Article

A02-045 Thermally Induced Attitude Disturbance Control for a Spacecraft with a Flexible Boom. Sang-Young Park, *Naval Postgraduate School* (**39**, 2, p. 325) Engineering Note

A02-046 Review of Spacecraft Cryogenic Coolers. Ravinder Singh Bhatia, *California Institute of Technology* (**39**, 3, p. 329) Survey

A02-047 Plasma Propulsion Options for Multiple Terrestrial Planet Finder Architectures. Kurt A. Polzin, Edgar Y. Choueiri, Pini Gurfil, and N. Jeremy Kasdin, *Princeton University* (**39**, 3, p. 347) Article

A02-048 Comprehensive Numerical Study of Jet-Flow Impingement over Flat Plates . Junxiao Wu, Edward A. Luke, Xiao-Ling A. Tong, and Pasquale Cinnella, *Mississippi State University* (**39**, 3, p. 357) Article

A02-049 Hypersonic Flow over a Blunt Body with Plasma Injection. J. S. Shang and J. Hayes, *U.S. Air Force Research Laboratory*; and J. Menart, *Wright State University* (**39**, 3, p. 367) Article

A02-050 Numerical Investigation of Supersonic Jet Interaction for Finned Bodies. Mary Jane Graham, *U.S. Military Academy, West Point*; Paul Weinacht, *U.S. Army Research Laboratory*; and Julius Brandeis, *RAFAEL, Ministry of Defense* (**39**, 3, p. 376) Article

A02-051 Linearized Motion of a Fin-Stabilized Projectile Subjected to a Lateral Impulse. Bernard J. Guidos, and Gene R. Cooper, *U. S. Army Research Laboratory* (**39**, 3, p. 384) Article based on AIAA Paper 2000-0767

A02-052 Plasma Response to Arcing in Ionospheric Plasma Environment: Laboratory Experiment. Mengu Cho, Raju Ramasamy, and Masayuki Hikita, *Kyushu Institute of Technology, Japan*; and Koji Tanaka and Susumu Sasaki, *Institute of Space and Astronautical Sciences, Japan* (**39**, 3, p. 392) Article based on AIAA Paper 2001-0955

A02-053 Plasma Response to Jump of Insulator Surface Potential in Ionospheric Plasma Environment. Mengu Cho, Raju Ramasamy, and Masayuki Hikita, *Kyushu Institute of Technology, Japan*; and Koji Tanaka and Susumu Sasaki, *Institute of Space and Astronautical Sciences, Japan* (**39**, 3, p. 400) Article based on AIAA Paper 2001-0955

A02-054 Particle-in-Cell with Monte Carlo Simulation of SPT-100 Exhaust Plumes. Francesco Taccogna, Savino Longo, and Mario Capitelli, *University of Bari, Italy* (**39**, 3, p. 409) Article

A02-055 Optimized Solutions for Kistler K-1 Branching Trajectories Using Multidisciplinary Design Optimization Techniques. Laura A. Ledsinger and John R. Olds, *Georgia Institute of Technology* (**39**, 3, p. 420) Article

A02-056 Mean and Fluctuating Pressure in Boat-Tail Separated Flows at Transonic Speeds. Rajan Kumar and P. R. Viswanath, *National Aerospace Laboratories, India*; and A. Prabhu, *Indian Institute of Science, India* (**39**, 3, p. 430) Article

A02-057 Numerical Analysis on Separation Dynamics of Strap-On Boosters in the Atmosphere. Seongjin Choi, Chongam Kim, and Oh-Hyun Rho, *Seoul National University, Republic of Korea*; and Jeong-joo Park, *Korea Aerospace Research Institute, Republic of Korea* (**39**, 3, p. 439) Article

A02-058 Effects of Ambient Air Exposure on Atomic Oxygen-Exposed Kapton-H Films. Masahito Tagawa, Kumiko Yokota, and Nobuo Ohmae, *Kobe University, Japan*; and Hiroshi Kinoshita, *Osaka University, Japan* (**39**, 3, p. 447) Article

A02-059 Detection of Hydrogen Leakage in a Composite Sandwich Structure at Cryogenic Temperature. H. Kevin Rivers and Joseph G. Sikora, *NASA Langley Research Center*; and Sankara N. Sankaran, *Lockheed Martin Space Operations* (**39**, 3, p. 452) Article based on AIAA Paper 2001-1218

A02-060 Everything Is Relative in Spacecraft System Alignment Calibration. Mark E. Pittelkau, *Johns Hopkins University Applied Physics Laboratory* (**39**, 3, p. 460) Article

A02-061 Unsteady Separation in Flare-Induced Hypersonic Shock-Wave Boundary-Layer Interaction Flowfield. S. B. Verma and G. Koppenwallner, *Hyperschall Technologie Göttingen, Germany* (**39**, 3, p. 467) Engineering Note

A02-062 Modeling of Performance of an Artillery Shell Using Neural Networks. A. K. Ghosh, S. C. Raisinghani, and S. K. Dehury, *Indian Institute of Technology Kanpur, India* (**39**, 3, p. 470) Engineering Note

A02-063 Field-Programmable Gate-Array-Based Graph Coloring Accelerator. Louis M. Pochet, M. L. Linderman, S. L. Drager, and R. L. Kohler, *U.S. Air Force Research Laboratory* (**39**, 4, p. 474) Article

A02-064 Advances in Data Handling Systems for Space Experiment Control. James C. Lyke and Paul A. Brezna, *U.S. Air Force Research Laboratory*; and Keith Avery, *Mission Research Corporation* (**39**, 4, p. 481) Article

A02-065 Cellular Automata-Based Reconfigurable Systems as Transitional Approach to Gigascale Electronic Architectures. James C. Lyke, Greg W. Donohue, and Shashi P. Karna, *U.S. Air Force Research Laboratory* (**39**, 4, p. 489) Article

A02-066 New Methodology for Simulation of Soft Errors in Digital Processors. Sana Rezgui and Raoul Velazco, *Centre National de la Recherche Scientifique, France*; Santiago Rodríguez, *Instituto Nacional de Técnica Aerospacial, Spain*; and Robert Ecoffet, *Centre National d'Etudes Spatiales, France* (**39**, 4, p. 495) Article

A02-067 Coupled Aeroheating/Ablation Analysis for Missile Configurations. A. L. Murray, *ITT Aerotherm*; and G. W. Russel, *U.S. Army Aviation and Missile Command* (**39**, 4, p. 501) Article

A02-068 Thermal Analysis and Design Optimization of Multilayer Insulation for Reentry Aerodynamic Heating. Kamran Daryabeigi, *NASA Langley Research Center* (**39**, 4, p. 509) Article

A02-069 Initial Guess Generation for Rocket Ascent Trajectory Optimization Using Indirect Methods. Peter F. Gath and Klaus H. Well, *University of Stuttgart, Germany*; and Klaus Mehlem, *European Space Research and Technology Center, The Netherlands* (**39**, 4, p. 515) Article based on AIAA Paper 2000-4589

A02-070 Evolved Seasparrow Missile Jet Vane Control System Prototype Hardware Development. Andrew B. Facciano, Karleen G. Seybold, Teri L. Westberry-Kutz, and Dale O. Widmer, *Raytheon Missile Systems* (**39**, 4, p. 522) Article

A02-071 Collision Risk Posed to the Global Positioning System by Disposal Orbit Instability. Alan B. Jenkin and R. Anne Gick, *The Aerospace Corporation* (**39**, 4, p. 532) Article based on AIAA Paper AAS 01-115

A02-072 Energetic Cost and Viability of the Proposed Space Debris Mitigation Measures. A. Rossi, *CNUCE—Consiglio Nazionale delle Ricerche, Italy* (**39**, 4, p. 540) Article

A02-073 Space Systems Flexibility Provided by On-Orbit Servicing: Part 1. Joseph H. Saleh, *MIT*; and Elisabeth Lamassoure and Daniel E. Hastings, *Massachusetts Institute of Technology* (**39**, 4, p. 551) Article

A02-074 Space Systems Flexibility Provided by On-Orbit Servicing: Part 2. Elisabeth Lamassoure, Joseph H. Saleh, and Daniel E. Hastings, *Massachusetts Institute of Technology* (**39**, 4, p. 561) Article

A02-075 First Stage Design Variations of Partially Reusable Launch Vehicles. Martin Sippel, Uta Atanassov, Josef Klevanski, and Volker Schmid, *DLR, German Aerospace Center, Germany* (**39**, 4, p. 571) Article

A02-076 Parametric Analysis of Fiber-Reinforced Laminated Momentum Wheel Rotors. Rania A. Hassan, *Purdue University*; Maher Y. A. Younan, *American University in Cairo, Egypt*; and Hani A. Arafa and Yehia A. Bahei-El-Din, *Cairo University, Egypt* (**39**, 4, p. 580) Article

A02-077 Design of the First InterplanetarySolar Electric Propulsion Mission. Marc D. Rayman and Steven N. Williams, *Jet Propulsion Laboratory, California Institute of Technology* (**39**, 4, p. 589) Article

A02-078 Drag Reduction on Blunt-Based Vehicles Using Forebody Surface Roughness. Stephen A. Whitmore, *Naval Postgraduate School*; and Jonathan W. Naughton, *University of Wyoming* (**39**, 4, p. 596) Article

A02-079 Applications of a Counterflow Drag Reduction Technique in High-Speed Systems. Eswar Josyula, Mark Pinney, and William B. Blake, *U.S. Air Force Research Laboratory* (**39**, 4, p. 605) Article based on AIAA Paper 2001-2437

A02-080 Identification of Influential Uncertainties in Monte Carlo Analysis. Toshikazu Motoda, *National Space Development Agency, Japan*; and Yoshikazu Miyazawa, *National Aerospace Laboratory, Japan* (**39**, 4, p. 615) Article

A02-081 Development of a Runge-Kutta Scheme with Total Variation Diminishing for Magnetogasdynamics. Henri-Marie Damevin and Klaus A. Hoffman, *Wichita State University* (**39**, 4, p. 624) Article

A02-082 Sabot Opening Lift Force: Analysis, Computation, and Test. Ameer G. Mikhail and Karen R. Heavey, *U.S. Army Research Laboratory* (**39**, 4, p. 633) Engineering Note based on AIAA Paper 2000-0389

A02-083 Atmospheric Reentry Modeling and Simulation. R. R. Costa, J. A. Silva, S. F. Wu, Q. P. Chu, and J. A. Mulder, *Delft University of Technology, The Netherlands* (**39**, 4, p. 636) Engineering Note

A02-084 New Reliability Configuration for Large Planetary Descent Vehicles. Hüseyin Sarper and Wolfgang J. Sauer, *University of Southern Colorado* (**39**, 4, p. 639) Engineering Note

A02-085 Computational Investigation of Three-Dimensional Flow Effects on Micronozzles. R. D. D. Menzies, B. E. Richards, K. J. Badcock, J. Löseken, and M. Kahl, *University of Glasgow, Scotland, United Kingdom* (**39**, 4, p. 642) Engineering Note

A02-086 Payload Deployment by Reusable Launch Vehicle Using Tether. K. D. Kumar, *National Aaerospace Laboratory, Flight Division, Japan* (**39**, 4, p. 644) Errata

A02-087 Dimensional Repeatability of an Elastically Folded Composite Hinge for Deployed Spacecraft Optics. Jeanette L. Domber, Jason D. Hinkle, and Lee D. Peterson, *University of Colorado*; and Peter A. Warren, *Foster-Miller, Inc.* (**39**, 5, p. 646) Article based on AIAA Paper 2001-1539

A02-088 Design Study of a Square Solar Sail Architecture. G. Greschik and M. M. Mikulas, *University of Colorado* (**39**, 5, p. 653) Article

A02-089 Geometric Imperfection Effects in an Elastically Deployable Isogrid Column. Jason D. Hinkle, *University of Colorado*; Peter Warren, *Foster-Miller Inc.*; and Lee D. Peterson, *University of Colorado* (**39**, 5, p. 662) Article

A02-090 Gore/Seam Architectures for Gossamer Structures. C. H. Jenkins, *South Dakota School of Mines and Technology*; and W. W. Schur, *NASA Wallops Flight Facility* (**39**, 5, p. 669) Article

A02-091 Rational for Defining Structural Requirements for Large Space Telescopes. Mark S. Lake, *Composite Technology Development, Inc.*; Lee D. Peterson, *University of Colorado*; and Marie B. Levine, *Jet Propulsion Laboratory, California Institute of Technology* (**39**, 5, p. 674) Article

A02-092 Self-Rigidizable Space Inflatable Boom. Michael Lou and Houfei Fang, *Jet Propulsion Laboratory, California Institute of Technology*; and Lih-Min Hsia, *California State University at Los Angeles* (**39**, 5, p. 682) Article

A02-093 Multilayered Polymer Mirror Experiment. David Mollenhauer, *U.S. Air Force Research Laboratory*; and John Camping, *University of Dayton* (**39**, 5, p. 691) Article

A02-094 Deflection of Multicellular Inflatable Tubes for Redundant Space Structures. Hiraku Sakamoto, M. C. Natori, *The Instititute of Space and Astronautical Science, Japan*; and Yasuyuki Miyazaki, *Nihon University, Japan* (**39**, 5, p. 695) Article based on AIAA Paper 2001-1617

A02-095 Deployable Tensegrity Reflectors for Small Satellites. A. G. Tibert and S. Pellegrino, *University of Cambridge, England, United Kingdom* (**39**, 5, p. 701) Article based on AIAA Paper 2001-1261

A02-096 Resistive Deployment of Inflatable Structures Using Velcro. Moktar Salama, H. Fang, and M. Lou, *Jet Propulsion Laboratory, California Institute of Technology* (**39**, 5, p. 711) Article

A02-097 Corner Wrinkling of a Square Membrane Due to Symmetric Mechanical Loads. Joseph R. Blandino, *James Madison University*; J. D. Johnston, *NASA Goddard Spaceflight Center*; and Urmil K. Dharamsi, *James Madison University* (**39**, 5, p. 717) Article

A02-098 Modeling a Piezothermoelastic Beam-String. James W. Rogers Jr., *U.S. Air Force Research Laboratory*; and Gregory S. Agnes, *U.S. Air Force Institute of Technology* (**39**, 5, p. 725) Article

A02-099 Nonlinear Pressurization and Modal Analysis Procedure for Dynamic Modeling of Inflatable Structures. Kurt B. Smalley, *Clarkson University*; and Michael L. Tinker, *NASA Marshall Space Flight Center* (**39**, 5, p. 732) Article

A02-100 Arizona State University Satellite (ASUSat1): Low-Cost, Student-Designed Nanosatellite. Assi Friedman, Brian Underhill, Shea Ferring, Christian Lenz, Joel Rademacher, and Helen Reed, *Arizona State University* (**39**, 5, p. 740) Article

A02-101 Similarities in the Plasma Wake of the Moon and Space Shuttle. W. M. Farrell, *NASA Goddard Space Flight Center*; A. C. Tribble, *Rockwell Collins*; and J. T. Steinberg, *Los Alamos National Laboratory* (**39**, 5, p. 749) Article

A02-102 Satellite Attitude Stabilization Through Kite-Like Tether Configuration. K. D. Kumar, *National Aaerospace Laboratory, Flight Division, Japan*; and T. Yasaka, *Kyushu University, Japan* (**39**, 5, p. 755) Article

A02-103 Optimization of Double Link Transmision in Case in Hybrid Orbit Satellite Constellations. Michele Luglio, and Walter Piertroni, *University of Rome "Tor Vergata", Italy* (**39**, 5, p. 761) Article

A02-104 Deployment Repeatability of a Space Telescope Reflector Petal. Johanne C. Heald and Lee D. Peterson, *University of Colorado* (**39**, 5, p. 771) Article based on AIAA Paper 2001-1302

A02-105 Spin Index Determination of the Hawkeye Spacecraft. Scott A. Boardsen and Ramona L. Kessel, *NASA Goddard Space Flight Center* (**39**, 5, p. 780) Article

A02-106 Multidisciplinary Analysis of a Lifting Body Launch Vehicle. Paul V. Tartabini, Kathryn E. Wurster, J. J. Korte, and Roger A. Lepsch, *NASA Langley Research Center* (**39**, 5, p. 788) Article based on AIAA Paper 2000-1045

A02-107 Orbit Determination of Spacecraft Using Global Positioning System Single-Frequency Measurement. Jae-Cheol Yoon, Kyoung-Min Roh, Eun-Seo Park, Bo-Yeon Moon, and Kyu-Hong Choi, *Yonsei University, Republic of Korea*; Jeong-Sook Lee, Byoung-Sun Lee, and Jaehoon Kim, *Electronics and Telecommunications Research Institute, Republic of Korea*; and Young-Keun Chang, *Hankuk Aviation University, Republic of Korea* (**39**, 5, p. 796) Article

A02-108 Supersonic/Hypersonic Flutter and Postflutter of Geometrically Imperfect Circular Cylindrical Panels. Liviu Librescu and Piergiovanni Marzocca, *Virginia Polytechnic Institute and State University*; and Walter A. Silva, *NASA Langley Research Center* (**39**, 5, p. 802) Article

A02-109 Alternate Architecture for NASA's Space Launch Initiative. Frederick W. Boltz, *Launch Vehicle Technology* (**39**, 5, p. 813) Engineering Note

A02-110 Simplified Algorithm for Short Target-Approach Paths in Orbit. Hans F. Meissinger and David Diaz, *Microcosm, Inc.* (**39**, 5, p. 815) Engineering Note

A02-111 Low-Cost Small-Satellite Delivery System. Frederick W. Boltz, *Launch Vehicle Technology* (**39**, 5, p. 818) Engineering Note

A02-112 Electroactive Polymers as Artificial Muscles: A Review. Yoseph Bar-Cohen, *Jet Propulsion Laboratory, California Institute of Technology* (**39**, 6, p. 822) Article based on AIAA Paper 2001-1492

A02-113 Finite Element Modeling of the Axial Collapse of Foam-Filled Structures. S. A. Meguid and J. Heyerman, and J. C. Stranart, *University of Toronto, Canada* (**39**, 6, p. 828) Article

A02-114 Electron, Proton, and Ultraviolet Radiation Effects on Thermophysical Properties of Polymeric Films. Dennis A. Russel, *Boeing Phantom Works*; J. W. Connell, *NASA Langley Research Center*; and Lawrence B. Fogdall, *Light Technologies, Inc.* (**39**, 6, p. 833) Article

A02-115 Time-Dependent Response of Thin Film Piezoelectric Polymer Polyvinylidene Fluoride. Aleksandra M. Vinogradov, *Montana State University*; and Shane C. Schumacher, *University of Wyoming* (**39**, 6, p. 839) Article

A02-116 Estimation and Prediction of Orbital Debris Reentry Trajectories. Jason M. Tardy and Craig A. Kluever, *University of Missouri–Columbia* (**39**, 6, p. 845) Article

A02-117 Orbit Determination for the QuikSCAT Spacecraft. Blair F. Thompson, Matthew C. Meek, Kenn L. Gold, Penina Axelrad, and George H. Born, *University of Colorado*; and Daniel G. Kubitschek, *Jet Propulsion Laboratory, California Institute of Technology* (**39**, 6, p. 852) Article

A02-118 Optimal Spacecraft Rendezvous Using Genetic Algorithms. Young Ha Kim and David B. Spencer, *Pennsylvania State University* (**39**, 6, p. 859) Article

A02-119 Nonlinear Momentum Transfer Control of Spacecraft by Feedback Linearization. Hyochoong Bang, Hyun-Sam Myung, and M. -J. Tahk, *Korea Advanced Institute of Science and Technology, Republic of Korea* (**39**, 6, p. 866) Article

A02-120 Realizing "2001: A Space Odyssey": Piloted Spherical Torus Nuclear Fusion Propulsion. Craig H. Williams, Leonard A. Dudzinski, Stanley K. Borowski, and Albert J. Juhasz, *NASA John H. Glenn Research Center at Lewis Field* (**39**, 6, p. 874) Article based on AIAA Paper 2001-3805

A02-121 Electric Propulsion Plasma Simulations and Influence on Spacecraft Charging. M. Tajmar, *ARC Seibersdorf Research, Austria* (**39**, 6, p. 886) Article

A02-122 Plume Modeling of Stationary Plasma Thrusters and Interactions with the Express-A-Spacecraft. Ioannis G. Mikellides and Gary A. Jongeward, *Science Applications International Corporation*; Ira Katz, *Jet Propulsion Laboratory, California Institute of Technology*; and David H. Manzella, *University of Toledo* (**39**, 6, p. 894) Article

A02-123 Plume Study of a 1.35-kW SPT-100 Using an ExB Probe. Sang-Wook Kim and Alec D. Gallimore, *University of Michigan* (**39**, 6, p. 904) Article based on AIAA Paper 99-2423

A02-124 Aerodynamics of Two Side-by-Side Plates in Hypersonic Rarefied-Gas Flows. Vladimir V. Riabov, *Rivier College* (**39**, 6, p. 910) Article

A02-125 Power-Law Shaped Leading Edges in Rarefied Hypersonic Flow. Wilson F.N. Santos, *National Institute for Space Research, Brazil*; and Mark J. Lewis, *University of Maryland* (**39**, 6, p. 917) Article

A02-126 Modeling Jupiter's Internal Electrostatic Discharge Environment. Robin W. Evans, *Gibbel Corporation*; and Henry B. Garrett, *Jet Propulsion Laboratory, California Institute of Technology* (**39**, 6, p. 926) Article

A02-127 Payload Mass Fraction Optimization for Solar Sail Cargo Missions. Colin R. McInnes, Gareth Hughes, and Malcolm Macdonald, *University of Glasgow, Scotland, U.K.* (**39**, 6, p. 933) Engineering Note
